8m Sports Fishing Vessel

PRINCIPAL PARTICULARS

Overall Length	8.00 metres
Waterline Length	6.74 metres
Beam	2.72 metres
Fuel	600 litres
Main Engines	2 x Yamaha 225hp
Construction Materials	Marine Grade Aluminium

This 8m Sports Fishing Vessel can be used for near shore, inland and offshore fishing. The single chine design has a wide waterline beam and flatter bottom at the transom for maximum stability, and easy driving.

The forward helm position provides clear visibility, and keeps you dry in rough conditions, whilst allowing a large deck area with plenty of space for reeling in fish and ample load carrying capacity. When not being used for fishing expeditions, the design and size of the large deck, also makes this vessel suitable for entertaining and recreational activities.

With fuel capacity and sea keeping ability to venture offshore, whilst still being trailer able during daylight hours, the design opens up endless opportunities for the avid fisherman.

This vessel can be customised for your specific requirements, including kill tanks, live bait tanks, bait prep area, awnings, outrigger poles and rod holders.
